

Mouse anti-Meningococcal polysaccharide(A) antibody, mAb 6B7

Cat#: 05-0100

| GENERAL INFORMATION | |
|---|--|
| Physical State | Liquid |
| Immunogen | Meningococcal polysaccharide A |
| Preparation | This antibody is produced by a hybridoma cell, which is produced by the fusion of a mouse myeloma and a B cell, the B cell is obtained by immunizing mice with Meningococcal polysaccharide A. The IgG fraction of the cell culture supernatant was purified by protein G affinity chromatography. |
| Specificity | Base on ELISA, this antibody reacts with Meningococcal polysaccharide(A) Specifically. |
| Formulation | Please see Certificate of Analysis for specific instructions. For best performance, we strongly recommend you to follow the reconstitution protocol provided in the CoA. |
| Storage | This antibody can be stored at 2°C-8°C for short term (1-2 Week) without detectable loss of activity. Antibody products are stable for 2 years from date of receipt when stored at -20°C to -80°C. Avoid repeated freeze-thaw cycles. |
| APPLICATIONS | |
| Applications | ELISA |
| RECOMMENDED CONCENTRATION | |
| ELISA | This antibody is suitable for use in ELISA: $\geq 0.1 \mu\text{g/mL}$. |
| Please Note: Optimal concentrations/dilutions should be determined by the end user. | |
